

ABSTRACT

**UPDATING MALWARE DEFINITION DATA FOR MOBILE DATA
PROCESSING DEVICES**

5 The malware definition data 34 of a mobile data processing device 2, 6 is
updated via a data channel associated with a wireless telephony link to that mobile
data processing device. The data channel may be the same channel used for SMS
messaging and the transfer of control information. The mobile data processing device
is typically a mobile telephone. The update data may be digitally signed to increase
security.
